RECEIVED NOV 4 '91

Dr. Harmon C. McAllister
Research Director
The Council for Tobacco Res.-USA, Inc.
900 Third Avenue
New York, NY 10022

November 1, 1991

Dear Dr. McAllister,

It very much enjoyed talking to you about your institution and the possibility of your support for the forthcoming annual meeting of the american society for cell biology (ASCB).

I am writing to you as a follow up of the above exploring the possibility of funding from The Council for Tobacco Research - U.S.A., Inc. for organizing a subgroup meeting on the role of mechanical stress factors in controlling biological processes scheduled for December 8, 1991. This meeting is being organized under the auspices of the ASCB on December 8, 1991 (a copy of program attached); the ASCB will be attended by over five thousand scientists.

This interdisciplinary meeting will consist of leading physicians, scientists and engineers from all over the world whose research interest is focused in the area of cells' adaptation to mechanical stress with emphasis on atherosclerosis. This is the first effort of its kind in which scientists from a wide variety of disciplines will present their most recent data on cellular stress biology.

The contribution(s) received from your organization (range = US $ 500 to 5,000) will receive proper acknowledgement and will be used towards travel expense of invited speakers, printing and mailing of book of abstracts and, hosting of a reception during the interval. Please make your check payble to the American Society for Cellular Stress Biology (a not-for-profit organization). Should you desire so, you will have freedom to make check payble to the scientist(s) directly.

Thanking you,

Yours sincerely.

S Tripathi

Satish C. Tripathi, Ph.D.
